# Contents

Acknowledgments .....	xxiii
Introduction .....	xxv
<b>1 Introduction .....</b>	<b>1</b>
What Is a Relational Database? .....	2
Introducing the Structured Query Language (SQL) .....	3
Using SQL*Plus .....	4
Starting SQL*Plus .....	4
Starting SQL*Plus from the Command Line .....	6
Performing a SELECT Statement Using SQL*Plus .....	6
SQL Developer .....	7
Creating the Store Schema .....	10
Running the SQL*Plus Script to Create the Store Schema .....	10
Data Definition Language (DDL) Statements Used to Create the Store Schema ..	11
Adding, Modifying, and Removing Rows .....	20
Adding a Row to a Table .....	20
Modifying an Existing Row in a Table .....	22
Removing a Row from a Table .....	22
The BINARY_FLOAT and BINARY_DOUBLE Types .....	23
Benefits of BINARY_FLOAT and BINARY_DOUBLE .....	23
Using BINARY_FLOAT and BINARY_DOUBLE in a Table .....	24
Special Values .....	24
Quitting SQL*Plus .....	25
Introducing Oracle PL/SQL .....	25
Summary .....	26
<b>2 Retrieving Information from Database Tables .....</b>	<b>27</b>
Performing Single Table SELECT Statements .....	28
Retrieving All Columns from a Table .....	29
Specifying Rows to Retrieve Using the WHERE Clause .....	29
Row Identifiers .....	30
Row Numbers .....	30

**X** Oracle Database 11g SQL

Performing Arithmetic	31
Performing Date Arithmetic	31
Using Columns in Arithmetic	32
Using Column Aliases	34
Combining Column Output Using Concatenation	35
Null Values	35
Displaying Distinct Rows	37
Comparing Values	37
Using the SQL Operators	39
Using the LIKE Operator	40
Using the IN Operator	41
Using the BETWEEN Operator	42
Using the Logical Operators	43
Operator Precedence	44
Sorting Rows Using the ORDER BY Clause	44
Performing SELECT Statements That Use Two Tables	45
Using Table Aliases	47
Cartesian Products	48
Performing SELECT Statements That Use More than Two Tables	49
Join Conditions and Join Types	50
Non-equi Joins	50
Outer Joins	51
Self Joins	55
Performing Joins Using the SQL/92 Syntax	56
Performing Inner Joins on Two Tables Using SQL/92	56
Simplifying Joins with the USING Keyword	57
Performing Inner Joins on More than Two Tables Using SQL/92	58
Performing Inner Joins on Multiple Columns Using SQL/92	58
Performing Outer Joins Using SQL/92	59
Performing Self Joins Using SQL/92	60
Performing Cross Joins Using SQL/92	61
Summary	61
<b>3 Using SQL*Plus</b>	<b>63</b>
Viewing the Structure of a Table	64
Editing SQL Statements	65
Saving, Retrieving, and Running Files	66
Formatting Columns	70
Setting the Page Size	72
Setting the Line Size	73
Clearing Column Formatting	73
Using Variables	74
Temporary Variables	74
Defined Variables	77
Creating Simple Reports	79
Using Temporary Variables in a Script	80
Using Defined Variables in a Script	80
Passing a Value to a Variable in a Script	81
Adding a Header and Footer	82
Computing Subtotals	83

Getting Help from SQL*Plus .....	85
Automatically Generating SQL Statements .....	86
Disconnecting from the Database and Exiting SQL*Plus .....	86
Summary .....	87
<b>4 Using Simple Functions .....</b>	<b>89</b>
Using Single-Row Functions .....	90
Character Functions .....	90
Numeric Functions .....	98
Conversion Functions .....	102
Regular Expression Functions .....	109
Using Aggregate Functions .....	117
AVG() .....	118
COUNT() .....	118
MAX() and MIN() .....	119
STDDEV() .....	120
SUM() .....	120
VARIANCE() .....	120
Grouping Rows .....	120
Using the GROUP BY Clause to Group Rows .....	121
Incorrect Usage of Aggregate Function Calls .....	124
Using the HAVING Clause to Filter Groups of Rows .....	125
Using the WHERE and GROUP BY Clauses Together .....	126
Using the WHERE, GROUP BY, and HAVING Clauses Together .....	126
Summary .....	127
<b>5 Storing and Processing Dates and Times .....</b>	<b>129</b>
Simple Examples of Storing and Retrieving Dates .....	130
Converting Datetimes Using TO_CHAR() and TO_DATE() .....	131
Using TO_CHAR() to Convert a Datetime to a String .....	132
Using TO_DATE() to Convert a String to a Datetime .....	136
Setting the Default Date Format .....	139
How Oracle Interprets Two-Digit Years .....	140
Using the YY Format .....	140
Using the RR Format .....	140
Using Datetime Functions .....	142
ADD_MONTHS() .....	142
LAST_DAY() .....	144
MONTHS_BETWEEN() .....	144
NEXT_DAY() .....	144
ROUND() .....	145
SYSDATE .....	145
TRUNC() .....	146
Using Time Zones .....	146
Time Zone Functions .....	147
The Database Time Zone and Session Time Zone .....	147
Obtaining Time Zone Offsets .....	149
Obtaining Time Zone Names .....	149
Converting a Datetime from One Time Zone to Another .....	150

**xii** Oracle Database 11g SQL

Using Timestamps	150
Using the Timestamp Types	150
Timestamp Functions	154
Using Time Intervals	159
Using the INTERVAL YEAR TO MONTH Type	160
Using the INTERVAL DAY TO SECOND Type	162
Time Interval Functions	164
Summary	166
<b>6 Subqueries</b>	<b>167</b>
Types of Subqueries	168
Writing Single-Row Subqueries	168
Subqueries in a WHERE Clause	168
Using Other Single-Row Operators	169
Subqueries in a HAVING Clause	170
Subqueries in a FROM Clause (Inline Views)	171
Errors You Might Encounter	172
Writing Multiple-Row Subqueries	173
Using IN with a Multiple-Row Subquery	173
Using ANY with a Multiple-Row Subquery	174
Using ALL with a Multiple-Row Subquery	175
Writing Multiple-Column Subqueries	175
Writing Correlated Subqueries	175
A Correlated Subquery Example	176
Using EXISTS and NOT EXISTS with a Correlated Subquery	176
Writing Nested Subqueries	179
Writing UPDATE and DELETE Statements Containing Subqueries	180
Writing an UPDATE Statement Containing a Subquery	180
Writing a DELETE Statement Containing a Subquery	181
Summary	181
<b>7 Advanced Queries</b>	<b>183</b>
Using the Set Operators	184
The Example Tables	185
Using the UNION ALL Operator	186
Using the UNION Operator	187
Using the INTERSECT Operator	188
Using the MINUS Operator	188
Combining Set Operators	188
Using the TRANSLATE() Function	190
Using the DECODE() Function	191
Using the CASE Expression	193
Using Simple CASE Expressions	193
Using Searched CASE Expressions	194
Hierarchical Queries	196
The Example Data	196
Using the CONNECT BY and START WITH Clauses	198
Using the LEVEL Pseudo Column	198
Formatting the Results from a Hierarchical Query	199
Starting at a Node Other than the Root	200
Using a Subquery in a START WITH Clause	200

Traversing Upward Through the Tree	201
Eliminating Nodes and Branches from a Hierarchical Query	201
Including Other Conditions in a Hierarchical Query	202
Using the Extended GROUP BY Clauses	203
The Example Tables	203
Using the ROLLUP Clause	205
Using the CUBE Clause	207
Using the GROUPING() Function	209
Using the GROUPING SETS Clause	211
Using the GROUPING_ID() Function	212
Using a Column Multiple Times in a GROUP BY Clause	214
Using the GROUP_ID() Function	215
Using the Analytic Functions	216
The Example Table	216
Using the Ranking Functions	217
Using the Inverse Percentile Functions	224
Using the Window Functions	225
Using the Reporting Functions	230
Using the LAG() and LEAD() Functions	232
Using the FIRST and LAST Functions	233
Using the Linear Regression Functions	233
Using the Hypothetical Rank and Distribution Functions	235
Using the MODEL Clause	236
An Example of the MODEL Clause	236
Using Positional and Symbolic Notation to Access Cells	237
Accessing a Range of Cells Using BETWEEN and AND	238
Accessing All Cells Using ANY and IS ANY	238
Getting the Current Value of a Dimension Using CURRENTV()	239
Accessing Cells Using a FOR Loop	240
Handling Null and Missing Values	241
Updating Existing Cells	243
Using the PIVOT and UNPIVOT Clauses	244
A Simple Example of the PIVOT Clause	244
Pivoting on Multiple Columns	246
Using Multiple Aggregate Functions in a Pivot	247
Using the UNPIVOT Clause	248
Summary	249
<b>8 Changing Table Contents</b>	<b>251</b>
Adding Rows Using the INSERT Statement	252
Omitting the Column List	253
Specifying a Null Value for a Column	253
Including Single and Double Quotes in a Column Value	254
Copying Rows from One Table to Another	254
Modifying Rows Using the UPDATE Statement	254
The RETURNING Clause	255
Removing Rows Using the DELETE Statement	256
Database Integrity	256
Enforcement of Primary Key Constraints	257
Enforcement of Foreign Key Constraints	257

**xiv** Oracle Database 11g SQL

Using Default Values	258
Merging Rows Using MERGE	259
Database Transactions	262
Committing and Rolling Back a Transaction	262
Starting and Ending a Transaction	263
Savepoints	264
ACID Transaction Properties	265
Concurrent Transactions	266
Transaction Locking	266
Transaction Isolation Levels	267
A SERIALIZABLE Transaction Example	269
Query Flashbacks	270
Granting the Privilege for Using Flashbacks	270
Time Query Flashbacks	270
System Change Number Query Flashbacks	272
Summary	273
<b>9 Users, Privileges, and Roles</b>	<b>275</b>
Users	276
Creating a User	276
Changing a User's Password	277
Deleting a User	278
System Privileges	278
Granting System Privileges to a User	278
Checking System Privileges Granted to a User	280
Making Use of System Privileges	281
Revoking System Privileges from a User	281
Object Privileges	281
Granting Object Privileges to a User	282
Checking Object Privileges Made	283
Checking Object Privileges Received	284
Making Use of Object Privileges	286
Synonyms	287
Public Synonyms	287
Revoking Object Privileges	288
Roles	289
Creating Roles	289
Granting Privileges to Roles	290
Granting Roles to a User	290
Checking Roles Granted to a User	290
Checking System Privileges Granted to a Role	291
Checking Object Privileges Granted to a Role	292
Making Use of Privileges Granted to a Role	293
Default Roles	294
Revoking a Role	294
Revoking Privileges from a Role	294
Dropping a Role	295
Auditing	295
Privileges Required to Perform Auditing	295
Auditing Examples	295

	Audit Trail Views .....	297
	Summary .....	297
<b>10</b>	<b>Creating Tables, Sequences, Indexes, and Views .....</b>	<b>299</b>
	Tables .....	300
	Creating a Table .....	300
	Getting Information on Tables .....	302
	Getting Information on Columns in Tables .....	303
	Altering a Table .....	303
	Renaming a Table .....	313
	Adding a Comment to a Table .....	313
	Truncating a Table .....	314
	Dropping a Table .....	314
	Sequences .....	314
	Creating a Sequence .....	314
	Retrieving Information on Sequences .....	316
	Using a Sequence .....	317
	Populating a Primary Key Using a Sequence .....	319
	Modifying a Sequence .....	320
	Dropping a Sequence .....	320
	Indexes .....	320
	Creating a B-tree Index .....	321
	Creating a Function-Based Index .....	322
	Retrieving Information on Indexes .....	323
	Retrieving Information on the Indexes on a Column .....	323
	Modifying an Index .....	324
	Dropping an Index .....	324
	Creating a Bitmap Index .....	324
	Views .....	325
	Creating and Using a View .....	326
	Modifying a View .....	333
	Dropping a View .....	334
	Flashback Data Archives .....	334
	Summary .....	337
<b>11</b>	<b>Introducing PL/SQL Programming .....</b>	<b>339</b>
	Block Structure .....	340
	Variables and Types .....	342
	Conditional Logic .....	342
	Loops .....	343
	Simple Loops .....	343
	WHILE Loops .....	344
	FOR Loops .....	344
	Cursors .....	345
	Step 1: Declare the Variables to Store the Column Values .....	346
	Step 2: Declare the Cursor .....	346
	Step 3: Open the Cursor .....	346
	Step 4: Fetch the Rows from the Cursor .....	347
	Step 5: Close the Cursor .....	347
	Complete Example: product_cursor.sql .....	348

**xvi** Oracle Database 11g SQL

Cursors and FOR Loops	349
OPEN-FOR Statement	350
Unconstrained Cursors	352
Exceptions	353
ZERO_DIVIDE Exception	355
DUP_VAL_ON_INDEX Exception	356
INVALID_NUMBER Exception	356
OTHERS Exception	357
Procedures	358
Creating a Procedure	358
Calling a Procedure	360
Getting Information on Procedures	361
Dropping a Procedure	362
Viewing Errors in a Procedure	362
Functions	363
Creating a Function	363
Calling a Function	364
Getting Information on Functions	365
Dropping a Function	365
Packages	365
Creating a Package Specification	365
Creating a Package Body	366
Calling Functions and Procedures in a Package	367
Getting Information on Functions and Procedures in a Package	368
Dropping a Package	368
Triggers	369
When a Trigger Fires	369
Set Up for the Example Trigger	369
Creating a Trigger	369
Firing a Trigger	371
Getting Information on Triggers	372
Disabling and Enabling a Trigger	374
Dropping a Trigger	374
New Oracle Database 11g PL/SQL Features	374
SIMPLE_INTEGER Type	375
Sequences in PL/SQL	375
PL/SQL Native Machine Code Generation	377
Summary	377
<b>12 Database Objects</b>	<b>379</b>
Introducing Objects	380
Creating Object Types	381
Using DESCRIBE to Get Information on Object Types	382
Using Object Types in Database Tables	383
Column Objects	383
Object Tables	386
Object Identifiers and Object References	390
Comparing Object Values	392
Using Objects in PL/SQL	394
The get_products() Function	395
The display_product() Procedure	396

The insert_product() Procedure	397
The update_product_price() Procedure	398
The get_product() Function	398
The update_product() Procedure	399
The get_product_ref() Function	400
The delete_product() Procedure	400
The product_lifecycle() Procedure	401
The product_lifecycle2() Procedure	402
Type Inheritance	403
Using a Subtype Object in Place of a Supertype Object	405
SQL Examples	405
PL/SQL Examples	406
NOT SUBSTITUTABLE Objects	407
Other Useful Object Functions	408
IS OF()	408
TREAT()	412
SYS_TYPEID()	416
NOT INSTANTIABLE Object Types	416
User-Defined Constructors	418
Overriding Methods	422
Generalized Invocation	423
Summary	425
<b>13 Collections</b>	<b>427</b>
Introducing Collections	428
Creating Collection Types	429
Creating a Varray Type	429
Creating a Nested Table Type	429
Using a Collection Type to Define a Column in a Table	430
Using a Varray Type to Define a Column in a Table	430
Using a Nested Table Type to Define a Column in a Table	430
Getting Information on Collections	431
Getting Information on a Varray	431
Getting Information on a Nested Table	432
Populating a Collection with Elements	434
Populating a Varray with Elements	434
Populating a Nested Table with Elements	434
Retrieving Elements from Collections	435
Retrieving Elements from a Varray	435
Retrieving Elements from a Nested Table	436
Using TABLE() to Treat a Collection as a Series of Rows	436
Using TABLE() with a Varray	437
Using TABLE() with a Nested Table	438
Modifying Elements of Collections	438
Modifying Elements of a Varray	438
Modifying Elements of a Nested Table	439
Using a Map Method to Compare the Contents of Nested Tables	440
Using CAST() to Convert Collections from One Type to Another	443
Using CAST() to Convert a Varray to a Nested Table	443
Using CAST() to Convert a Nested Table to a Varray	443

**xviii** Oracle Database 11g SQL

Using Collections in PL/SQL	444
Manipulating a Varray	444
Manipulating a Nested Table	446
PL/SQL Collection Methods	448
Multilevel Collections	458
Oracle Database 10g Enhancements to Collections	461
Associative Arrays	462
Changing the Size of an Element Type	463
Increasing the Number of Elements in a Varray	463
Using Varrays in Temporary Tables	463
Using a Different Tablespace for a Nested Table's Storage Table	463
ANSI Support for Nested Tables	464
Summary	473
<b>14 Large Objects</b>	<b>475</b>
Introducing Large Objects (LOBs)	476
The Example Files	476
Large Object Types	477
Creating Tables Containing Large Objects	478
Using Large Objects in SQL	478
Using CLOBs and BLOBs	478
Using BFILES	481
Using Large Objects in PL/SQL	482
APPEND()	485
CLOSE()	485
COMPARE()	486
COPY()	487
CREATETEMPORARY()	488
ERASE()	488
FILECLOSE()	489
FILECLOSEALL()	489
FILEEXISTS()	490
FILEGETNAME()	490
FILEISOPEN()	490
FILEOPEN()	491
FREETEMPORARY()	492
GETCHUNKSIZE()	492
GET_STORAGE_LIMIT()	492
GETLENGTH()	493
INSTR()	493
ISOPEN()	494
ISTEMPORARY()	495
LOADFROMFILE()	496
LOADBLOBFROMFILE()	497
LOADCLOBFROMFILE()	497
OPEN()	498
READ()	499
SUBSTR()	500
TRIM()	501

WRITE()	502
WRITEAPPEND()	503
Example PL/SQL Procedures	503
LONG and LONG RAW Types	521
The Example Tables	521
Adding Data to LONG and LONG RAW Columns	521
Converting LONG and LONG RAW Columns to LOBs	522
Oracle Database 10g Enhancements to Large Objects	523
Implicit Conversion Between CLOB and NCLOB Objects	523
Use of the :new Attribute When Using LOBs in a Trigger	524
Oracle Database 11g Enhancements to Large Objects	525
Encrypting LOB Data	525
Compressing LOB Data	529
Removing Duplicate LOB Data	529
Summary	529
<b>15 Running SQL Using Java</b>	<b>531</b>
Getting Started	532
Configuring Your Computer	533
Setting the ORACLE_HOME Environment Variable	533
Setting the JAVA_HOME Environment Variable	534
Setting the PATH Environment Variable	534
Setting the CLASSPATH Environment Variable	534
Setting the LD_LIBRARY_PATH Environment Variable	535
The Oracle JDBC Drivers	535
The Thin Driver	535
The OCI Driver	536
The Server-Side Internal Driver	536
The Server-Side Thin Driver	536
Importing the JDBC Packages	536
Registering the Oracle JDBC Drivers	537
Opening a Database Connection	537
Connecting to the Database Using getConnection()	537
The Database URL	538
Connecting to the Database Using an Oracle Data Source	539
Creating a JDBC Statement Object	542
Retrieving Rows from the Database	543
Step 1: Create and Populate a ResultSet Object	543
Step 2: Read the Column Values from the ResultSet Object	544
Step 3: Close the ResultSet Object	546
Adding Rows to the Database	547
Modifying Rows in the Database	548
Deleting Rows from the Database	548
Handling Numbers	549
Handling Database Null Values	550
Controlling Database Transactions	552
Performing Data Definition Language Statements	553
Handling Exceptions	553
Closing Your JDBC Objects	554

**XX** Oracle Database 11g SQL

Example Program: BasicExample1.java	556
Compile BasicExample1	560
Run BasicExample1	561
Prepared SQL Statements	562
Example Program: BasicExample2.java	565
The Oracle JDBC Extensions	567
The oracle.sql Package	568
The oracle.jdbc Package	571
Example Program: BasicExample3.java	575
Summary	578
<b>16 SQL Tuning</b>	<b>579</b>
Introducing SQL Tuning	580
Use a WHERE Clause to Filter Rows	580
Use Table Joins Rather than Multiple Queries	581
Use Fully Qualified Column References When Performing Joins	582
Use CASE Expressions Rather than Multiple Queries	583
Add Indexes to Tables	584
Use WHERE Rather than HAVING	584
Use UNION ALL Rather than UNION	585
Use EXISTS Rather than IN	586
Use EXISTS Rather than DISTINCT	587
Use GROUPING SETS Rather than CUBE	588
Use Bind Variables	588
Non-Identical SQL Statements	588
Identical SQL Statements That Use Bind Variables	588
Listing and Printing Bind Variables	590
Using a Bind Variable to Store a Value Returned by a PL/SQL Function	590
Using a Bind Variable to Store Rows from a REFCURSOR	590
Comparing the Cost of Performing Queries	591
Examining Execution Plans	591
Comparing Execution Plans	597
Passing Hints to the Optimizer	598
Additional Tuning Tools	600
Oracle Enterprise Manager Diagnostics Pack	600
Automatic Database Diagnostic Monitor	600
Summary	601
<b>17 XML and the Oracle Database</b>	<b>603</b>
Introducing XML	604
Generating XML from Relational Data	604
XMLELEMENT()	605
XMLATTRIBUTES()	608
XMLFOREST()	608
XMLAGG()	609
XMLCOLATTVAL()	612
XMLCONCAT()	613
XMLPARSE()	613
XMLPI()	614
XMLCOMMENT()	614
