About the Author

After some years as a tea, tobacco, and dairy farmer in Africa and the UK, Kieron Dowling's IT background has spanned in excess of 25 years in Zambia, Australia, Fiji, Papua New Guinea, and Europe. Beginning in the days of punch-cards and paper-tape, throughout his career he has worked with IBM mainframes, progressing to the successful design of medical, agricultural, real-estate, and myriad other packages for the early PC market of the 80s and 90s. He has two Australian Design Awards for his Medical and Dental software. SAP was the natural progression, and today he has over 13 years PS and IM experience under his belt as he continues to service the Oil, Engineering, Manufacturing, Mining, and most other high-end business disciplines. He is also the author of several fiction thrillers. He lives in Rome, Italy.

to a Project Structure	44
Attachments and PS Text: Attachments to the Project Structure	45
Cost and Resource Planning	45
Structure Cost Planning via WBS: Direct Entry of Costs Against	
a WBS Structure, Without Regard to Cost Elements	46
Detailed Cost Planning via WBS: Planning Costs Against	
a WBS at Cost Element Level	46
Detailed Cost Planning via Network: Planning Costs Against	
a Network Activity Using Cost Elements, Materials,	
Services, or Activity Types	46
Easy Cost Planning via WBS: Planning Costs Against	
a WBS via Unit Costing, but with the Use of Cost Models	
to Make Data Entry Simpler	47
Plan Versions: Distinct Repositories for Keeping	
Your Planned Costs Separate	47
Statistical Key Figures: Objects Used for Storing	
and Planning Invisible Costs or Consumption	48
Overheads (CO): Additional Costs Calculated	
via Costing Sheets	48
Value Categories: Giving Meaning to Values	48
Budgeting	49
Budgeting in Projects: When the Budget Is Controlled	
from Within a Project	49
Budgeting in Investment Programs: When the Budget	
for All Projects Is Controlled by a Capital	
Investment Program	50
Availability Control: When You Need to Control Expenditure	50
Time and Capacity Planning	51
Dates in WBS: Managing Basic and Forecast Dates	51
Scheduling in Networks (Part 1): Managing Start/ Finish	
Rules and Executing Scheduling	51
Scheduling in Networks (Part 2): Managing Start/ Finish Rules	
and Executing Scheduling	52
Work Centers and Activity Types: Planning Capacities	
and the Cost of Utilizing the Resource	52
Workforce Planning: Planning Who Does What, and When	53

Revenue Planning	53
Structure Revenue Planning: Direct Entry of Revenue Against a WBS Structure, Without Regard to Revenue Elements	54
Detailed Revenue Planning: Planning Revenue Against a WBS by Revenue Element	54
Sales Orders (SD): Revenue Planning via Sales Order (or Quotation)	54
Execution	55
Status Management: Setting Project Restrictions (Business Processes) by Status	55
Actuals: Posting Actual Costs, Revenues, and Dates to a Project	56
Simulations: Simulating What You Want to Do Before You Really Do It, Without Committing	56
Project Versions: Snapshots of a Project for Comparison Purposes	57
Period-End (and Regular Processes)	57
Settlement: Transferring Actual Values to the "Owner"	57
Period-End: Executing Regular, Cyclical Processes	58
Progress (Part 1): Updating and Reviewing a Project's Progress	58
Progress (Part 2): Updating and Reviewing a Project's Progress	59
Archiving: Taking Your Projects out of the Live System	59
Billing: Sending the Customer an Invoice	60

Acknowledgments

SAP, naturally. Who have rekindled the professional lives of many a gifted dinosaur after the gradual decline of the mainframe! Thanks to Rettitishwarane Velayoudam for his contribution to the section on Project Progress under Tips and Tricks. I would also like to thank the staff of McGraw-Hill whose professional approach has made this possible.
