## **PART I Build a Site with Microsoft Expression Web 2**

---

<b>CHAPTER 1 Take a Program Tour and Start Your Site .....</b>	<b>3</b>
Get Around the Expression Web Interface .....	3
The Ins and Outs of Task Panes .....	4
Check Out the Default Task Panes .....	5
The Editing Window .....	10
Customize Preferences to Suit Your Work Style .....	11
Modify Expression Web 2 Options .....	12
Modify Expression Web 2 Page Editing Options .....	13
Build a New Site .....	13
Start a New Web Site .....	14
Import Content from Other Locations .....	16
Combine Sites .....	19
Choose a Web Site Location .....	21
Configure Web Site Settings .....	22
Summary .....	24
<b>CHAPTER 2 Build a Page and Add Text .....</b>	<b>25</b>
Create a New Page .....	25
Begin the Page's Design .....	25
Specify Page Characteristics .....	29
Preview Pages in a Browser .....	33
Word Processing in Expression Web 2 .....	33
Show Layout Assistants .....	34
Edit Text .....	35
Paste Content into a Page .....	40
Lay Out a Web Page .....	42
Organize Text with Lists .....	44
Check and Modify Words on a Page .....	46
Summary .....	51

## x Contents

<b>CHAPTER 3</b>	<b>Configure Images on a Page</b>	<b>53</b>
Manage Graphics in Expression Web 2		53
Graphic File Formats		53
Define Graphic Defaults		55
Specify an Image Editor		56
Use the Pictures Toolbar		57
Add Images to a Page		58
Insert Graphics from a File		58
Use a Photoshop File in Expression Web 2		61
Edit Image Features		63
Modify Image Colors		63
Change Dimensions and Appearance		65
Position Images on a Page		70
Insert a Tracing Graphic		70
Specify Image Alignments		72
Summary		76
<b>CHAPTER 4</b>	<b>Link Content in Your Site</b>	<b>77</b>
Hyperlink Basics		77
Hyperlink Paths		77
Define Different Link Types		78
Link to Specific Locations		82
Choose a Target Frame		84
Customize Link Appearances		85
Design Object Hyperlinks		87
Use Images as Links		87
Create Hotspots on an Image		88
Test and Evaluate Links		90
Summary		91

## **PART II** Style Your Site with Cascading Style Sheets

---

<b>CHAPTER 5</b>	<b>Take Care of Code and Tags Manually</b>	<b>95</b>
Work in Code View		95
Check Out Code View Features		96
Insert Comments and Code		97
Customize Code Display Options		99
Use IntelliSense to Prompt Your Code Writing		102
Use Code Snippets for Speedier Coding		104
Keep Track with Bookmarks		106
Access More Code Assistants		107
Use the Tag Properties Task Pane		107
Speed Things Up with Quick Tags		109
Summary		112

<b>CHAPTER 6</b>	<b>Create and Manage Styles in Expression Web 2</b>	<b>113</b>
Understanding CSS		114
Apply Inheritance to Page Contents		114
How to Write a CSS Statement		114
Specify a Type of Selector		115
Apply Style Rules		118
Use Expression Web CSS Tools		120
Specify Styling Preferences		120
Work with Styles in the Apply Styles Task Pane		124
Keep Track of Styles in the Manage Styles Task Pane		128
Write a New Style		129
Create a Style Sheet		132
Summary		135
<b>CHAPTER 7</b>	<b>Design CSS-Based Layouts</b>	<b>137</b>
Create CSS Layouts from Scratch		137
Use a Supplied Style Sheet		138
Write with IntelliSense		141
Write Different Types of Styles		144
Start a Paragraph with a Bang		144
Include Special Background Image Styles		146
Construct a Horizontal Menu		146
Customize Links without Writing JavaScript		151
Design Quick Column Layouts		154
Lay Out Pages with Positioning Properties		154
Specify Precise Positions and Display Using CSS		157
Generate CSS Reports		160
Check Your Styles' Locations		160
CSS Reports		161
Summary		164
<b>PART III Give Your Site Structure and Pizzazz</b>		
<b>CHAPTER 8</b>	<b>Lay Out Pages with Dynamic Web Templates and Layers</b>	<b>167</b>
Create Dynamic Web Templates		168
Create Blank Dynamic Templates		168
Convert HTML Documents to Dynamic Web Templates		170
Use Dynamic Web Templates		171
Create Real-Life Web Sites with Dynamic Web Templates		176
Create Layers		182
Summary		184
<b>CHAPTER 9</b>	<b>Organize Content in Tables and Frames</b>	<b>185</b>
Create Tables		185
Create Rows, Columns, and Headings		185
Tags Inside Table Cells		191

## xii Contents

Format Tables	194
Set the Background Color	194
Add Background Images	195
Insert Borders	195
Use Cell Padding and Cell Spacing	196
Adjust Content Alignment	197
Adjust the Size	198
Use Style Sheets to Format Tables	199
Lay Out Web Pages with Tables	199
Use Frames	202
Summary	206

### **CHAPTER 10 Use Behaviors for Action and Interaction** 207

Understand JavaScript	208
Create JavaScript with Expression Web 2: Add Behaviors	209
Use the Change Property and Change Property Restore Behaviors	211
Use Check Browser and Check Plug-in Behaviors	211
Use the Go To URL Behavior	214
Use Open Browser Window Behavior	215
Use Jump Menu Behavior	216
Use Play Sound Behavior	217
Use Popup Message Behavior	217
Use Preload Images Behavior	218
Use Call Script	219
Use Set Text	219
Rollover Images and Active Buttons	220
Summary	222

### **CHAPTER 11 Insert Media Elements** 223

Understand Silverlight	223
Use Silverlight Content	224
Create Silverlight Content	225
Understand Flash	229
Use Flash Content in Your Pages	229
Use Flash Banners	230
Create Flash Content	232
Understand Microsoft Media	234
Use Podcasts	236
Summary	238

## **PART IV Use Dynamic Pages and Publish Your Site**

---

### **CHAPTER 12 Collect and Validate Information with Forms** 241

Understand the Anatomy of a Form	241
Use Form Controls	242
Use the Options Button	243
Use the Advanced Button	244
Insert Fields into the Form	245

Work with Different Form Types .....	246
Use Input and Password Text .....	246
Use the Submit, Reset, and Normal Buttons .....	247
Allow File Selector Input .....	248
Insert Check Boxes, Radio Buttons, and Group Boxes .....	248
Use a Text Area .....	249
Use Images and Labels .....	249
Style Form Elements with CSS .....	249
Save Form Results .....	251
Send Form Data to a Page .....	251
Send Form Data to a File .....	252
Send Form Data to an E-mail Address .....	253
Validate Form Information .....	253
Check for Required Fields .....	253
Compare Fields .....	254
Use Regular Expressions .....	255
Summary .....	256
<b>CHAPTER 13 Build Dynamic Pages with PHP .....</b>	<b>257</b>
Dynamically Create Web Pages .....	257
Understand PHP Server Requirements .....	259
Add a PHP Page .....	260
Create Useful PHP Pages .....	262
Use PHP Server Variables .....	262
Use a Form from PHP .....	265
Use PHP Scripts .....	266
Use Full PHP Applications .....	266
Use Small PHP Scripts .....	267
Take Advantage of Expression's Built-in PHP Support .....	268
Summary .....	268
<b>CHAPTER 14 Work with ASP.NET .....</b>	<b>269</b>
ASP.NET Architecture .....	270
Get Started with ASP.NET Pages .....	271
Add a Button and a Button Event .....	273
Perform Calculations on User Data .....	275
Use Master Pages .....	276
Access Data from ASP.NET Pages .....	281
Display the Contents of an Access Database .....	281
Get More Control with the ListView Control .....	283
Summary .....	285
<b>CHAPTER 15 Make Your Site Available to Everyone .....</b>	<b>287</b>
Understand the Importance of Accessibility .....	287
An Accessibility Scenario .....	288
Legal Issues .....	288

## xiv Contents

Design Pages and Sites for Accessibility .....	289
Accessibility Principles .....	289
Use the Accessibility Checker .....	291
Summary .....	293

### **CHAPTER 16 Test and Publish the Site .....** **295**

Optimize Files for Efficiency .....	296
Choose the Best Image File Format .....	296
General Web Page Optimization Tips .....	298
Validate XHTML .....	300
Set Up the Remote Site .....	303
Set Up a Web Site on Internet Information Server .....	303
Set Up a Web Site on a Third-Party Hosting Service .....	308
Summary .....	311

## **PART V Appendixes**

---

### **APPENDIX A XHTML Tag Attributes .....** **315**

XHTML Tags .....	315
Meta Information .....	315
Basic Tags .....	316
Blocks .....	316
Character Format .....	317
Images .....	317
Links .....	317
Lists .....	318
Styles .....	318
Tables .....	318
Frames .....	319
Input .....	319
Output .....	320
Programming .....	320
HTML Colors .....	320

### **APPENDIX B Style Properties and Values .....** **323**

Text Properties .....	323
Background Properties .....	324
Border and Margin Properties .....	325
List Properties .....	326
Table Properties .....	326
Positioning Properties .....	327
Layout Properties .....	327
Printing Properties .....	328
Scrollbar Properties .....	329

### **Index .....** **331**
