CONTENTS

Introduction	xxix
--------------------	------

Part I Oracle Database 11g Administration

Chapter 1 Architectural Overview of Oracle Database 11g	3
Exam Objectives	3
Oracle Product Stack	4
Oracle Server Family	4
Oracle Development Tools	8
Oracle Applications	10
Prerequisite Concepts	11
Oracle Concepts	11
SQL Concepts	12
Operating System Concepts	13
Single-Instance Architecture	13
Single-Instance Database Architecture	13
Distributed Systems Architectures	16
Instance Memory Structures	19
The Database Buffer Cache	20
The Log Buffer	21
The Shared Pool	23
The Large Pool	26
The Java Pool	26
The Streams Pool	27
Instance Process Structures	28
SMON, the System Monitor	29
PMON, the Process Monitor	30
DBWn, the Database Writer	30
LGWR, the Log Writer	32
CKPT, the Checkpoint Process	33
MMON, the Manageability Monitor	34

	MMNL, the Manageability Monitor Light	35
	MMAN, the Memory Manager	35
	ARCn, the Archiver	35
	RECO, the Recoverer Process	36
	Some Other Background Processes	37
	Database Storage Structures	40
	The Physical Database Structures	41
	The Logical Database Structures	45
	The Data Dictionary	46
	Two-Minute Drill	49
	Single-Instance Architecture	49
	Instance Memory Structures	49
	Instance Process Structures	49
	Database Storage Structures	49
	Self Test	50
	Self Test Answers	52
Chapter 2	Installing and Creating a Database	55
	Exam Objectives	55
	Identify the Tools for Administering an Oracle Database	56
	The Oracle Universal Installer	56
	Database Creation and Upgrade Tools	60
	Tools for Issuing Ad Hoc SQL: SQL*Plus and SQL Developer ..	61
	Oracle Enterprise Manager	66
	Other Administration Tools	67
	Plan an Oracle Database Installation	68
	Choice of Operating System	68
	Hardware and Operating System Resources	69
	Optimal Flexible Architecture	71
	Environment Variables	72
	Install the Oracle Software by Using the Oracle Universal	
	Installer (OUI)	74
	Create a Database by Using the Database Configuration Assistant ..	77
	The Instance, the Database, and the Data Dictionary	78
	Using the DBCA to Create a Database	79
	The Scripts and Other Files Created by the DBCA	84
	The DBCA's Other Functions	90
	Two-Minute Drill	91
	Identify the Tools for Administering an Oracle Database	91
	Plan an Oracle Database Installation	92
	Install the Oracle Software by Using the Oracle Universal	
	Installer (OUI)	92
	Create a Database by Using the Database Configuration	
	Assistant	92
	Self Test	92
	Self Test Answers	96

Chapter 3	Instance Management	99
	Exam Objectives	99
	Set Database Initialization Parameters	101
	Static and Dynamic Parameters and the Initialization	
	Parameter File	101
	The Basic Parameters	103
	Describe the Stages of Database Startup and Shutdown	108
	Starting and Connecting to Database Control	108
	Starting the Database Listener	110
	Starting SQL*Plus	112
	Database Startup and Shutdown	112
	Use the Alert Log and Trace Files	121
	Use Data Dictionary and Dynamic Performance Views	123
	The Data Dictionary Views	123
	The Dynamic Performance Views	124
	Two-Minute Drill	126
	Describe the Stages of Database Startup and Shutdown	126
	Set Database Initialization Parameters	126
	Use the Alert Log and Trace Files	127
	Use Data Dictionary and Dynamic Performance Views	127
	Self Test	127
	Self Test Answers	130
Chapter 4	Oracle Networking	133
	Exam Objectives	133
	Configure and Manage the Oracle Network	134
	Oracle Net and the Client-Server Paradigm	134
	A Word on Oracle Net and Communication Protocols	136
	Establishing a Session	136
	Creating a Listener	139
	Database Registration	140
	Techniques for Name Resolution	143
	The Listener Control Utility	145
	Configuring Service Aliases	149
	Filenames and the TNSADMIN Environment Variable	151
	Database Links	153
	Use the Oracle Shared Server Architecture	157
	The Limitations of Dedicated Server Architecture	157
	The Shared Server Architecture	159
	Configuring Shared Server	161
	When to Use the Shared Server	162
	Two-Minute Drill	165
	Configure and Manage the Oracle Network	165
	Use the Oracle Shared Server Architecture	165
	Self Test	166
	Self Test Answers	169

Chapter 5	Oracle Storage	171
	Exam Objectives	171
	Overview of Tablespaces and Datafiles	172
	The Oracle Data Storage Model	172
	Segments, Extents, Blocks, and Rows	174
	File Storage Technologies	178
	Create and Manage Tablespaces	180
	Tablespace Creation	180
	Altering Tablespaces	186
	Dropping Tablespaces	191
	Oracle-Managed Files (OMF)	191
	Space Management in Tablespaces	194
	Extent Management	194
	Segment Space Management	196
	Two-Minute Drill	197
	Overview of Tablespaces and Datafiles	197
	Create and Manage Tablespaces	198
	Space Management in Tablespaces	198
	Self Test	198
	Self Test Answers	201
Chapter 6	Oracle Security	203
	Exam Objectives	203
	Create and Manage Database User Accounts	204
	User Account Attributes	205
	Authentication Methods	209
	Creating Accounts	213
	Grant and Revoke Privileges	216
	System Privileges	216
	Object Privileges	219
	Create and Manage Roles	223
	Creating and Granting Roles	223
	Predefined Roles	224
	Enabling Roles	225
	Create and Manage Profiles	229
	Password Management	229
	Resource Limits	230
	Creating and Assigning Profiles	231
	Database Security and Principle of Least Privilege	234
	Public Privileges	234
	Security-Critical Instance Parameters	235
	Work with Standard Database Auditing	240
	Auditing SYSDBA Activity	241
	Database Auditing	241
	Value-Based Auditing with Triggers	244
	Fine-Grained Auditing (FGA)	245

Two-Minute Drill	248
Create and Manage Database User Accounts	248
Grant and Revoke Privileges	248
Create and Manage Roles	249
Create and Manage Profiles	249
Database Security and Principle of Least Privilege	249
Work with Standard Database Auditing	249
Self Test	249
Self Test Answers	253

Part II SQL

Chapter 7	DDL and Schema Objects	259
	Exam Objectives	259
	Categorize the Main Database Objects	260
	Object Types	260
	Naming Schema Objects	261
	Object Namespaces	262
	List the Data Types That Are Available for Columns	263
	Create a Simple Table	266
	Creating Tables with Column Specifications	267
	Creating Tables from Subqueries	268
	Altering Table Definitions after Creation	269
	Dropping and Truncating Tables	270
	Create and Use Temporary Tables	273
	Indexes	275
	Why Indexes Are Needed?	275
	Types of Index	276
	Creating and Using Indexes	281
	Modifying and Dropping Indexes	282
	Constraints	283
	The Types of Constraint	283
	Defining Constraints	286
	Constraint State	288
	Constraint Checking	289
	Views	290
	Why Use Views at All?	291
	Simple and Complex Views	293
	CREATE VIEW, ALTER VIEW, and DROP VIEW	294
	Synonyms	295
	Sequences	298
	Creating Sequences	298
	Using Sequences	300
	Two-Minute Drill	303
	Categorize the Main Database Objects	303
	List the Data Types That Are Available for Columns	303

	Create a Simple Table	304
	Create and Use Temporary Tables	304
	Constraints	304
	Indexes	304
	Views	304
	Synonyms	305
	Sequences	305
	Self Test	305
	Self Test Answers	311
Chapter 8	DML and Concurrency	315
	Exam Objectives	315
	Data Manipulation Language (DML) Statements	316
	INSERT	316
	UPDATE	320
	DELETE	323
	TRUNCATE	325
	MERGE	326
	DML Statement Failures	328
	Control Transactions	330
	Database Transactions	330
	Executing SQL Statements	331
	Transaction Control: COMMIT, ROLLBACK, SAVEPOINT, SELECT FOR UPDATE	335
	Identify and Administer PL/SQL Objects	340
	Stored and Anonymous PL/SQL	340
	PL/SQL Objects	341
	Monitor and Resolve Locking Conflicts	346
	Shared and Exclusive Locks	346
	The Enqueue Mechanism	347
	Lock Contention	347
	Deadlocks	350
	Overview of Undo	351
	Transactions and Undo Data	352
	Managing Undo	354
	Error Conditions Related to Undo	354
	Parameters for Undo Management, and Retention Guarantee ..	355
	Sizing and Monitoring the Undo Tablespace	356
	Creating and Managing Undo Tablespaces	358
	Two-Minute Drill	359
	Describe Each Data Manipulation Language (DML) Statement	359
	Control Transactions	360
	Manage Data Using DML	360
	Identify and Administer PL/SQL Objects	360
	Monitor and Resolve Locking Conflicts	360
	Overview of Undo	360

	Transactions and Undo Data	361
	Managing Undo	361
	Self Test	361
	Self Test Answers	365
Chapter 9	Retrieving, Restricting, and Sorting Data Using SQL	367
	Exam Objectives	367
	List the Capabilities of SQL SELECT Statements	368
	Introducing the SQL SELECT Statement	368
	The DESCRIBE Table Command	369
	Capabilities of the SELECT Statement	370
	Data Normalization	371
	Create the Demonstration Schemas	375
	The HR and WEBSTORE Schemas	375
	Demonstration Schema Creation	379
	Execute a Basic SELECT Statement	381
	Syntax of the Primitive SELECT Statement	382
	Rules Are Meant to Be Followed	383
	SQL Expressions and Operators	386
	NULL Is Nothing	390
	Limit the Rows Retrieved by a Query	392
	The WHERE Clause	392
	Comparison Operators	395
	Boolean Operators	400
	Precedence Rules	402
	Sort the Rows Retrieved by a Query	403
	The ORDER BY Clause	403
	Ampersand Substitution	405
	Substitution Variables	406
	Define and Verify	409
	Two-Minute Drill	412
	List the Capabilities of SQL SELECT Statements	412
	Execute a Basic SELECT Statement	412
	Limit the Rows Retrieved by a Query	413
	Sort the Rows Retrieved by a Query	413
	Ampersand Substitution	413
	Self Test	414
	Self Test Answers	416
Chapter 10	Single-Row and Conversion Functions	419
	Exam Objectives	419
	Describe and Use Character, Number, and Date Functions in SQL ...	420
	Defining a Function	420
	Types of Functions	420
	Using Case Conversion Functions	421
	Using Character Manipulations Functions	423

	Using Numeric Functions	427
	Working with Dates	429
	Describe Various Types of Conversion Functions Available in SQL ...	434
	Conversion Functions	434
	Use the TO_CHAR, TO_NUMBER, and TO_DATE Conversion Functions	436
	Using the Conversion Functions	436
	Apply Conditional Expressions in a SELECT Statement	444
	Nested Functions	444
	Conditional Functions	445
	Two-Minute Drill	453
	Describe Various Types of Functions Available in SQL	453
	Use Character, Number, and Date Functions in SELECT Statements	453
	Describe Various Types of Conversion Functions Available in SQL	454
	Use the TO_CHAR, TO_NUMBER, and TO_DATE Conversion Functions	454
	Apply Conditional Expressions in a SELECT Statement	454
	Self Test	454
	Self Test Answers	457
Chapter 11	Group Functions	459
	Exam Objectives	459
	The Group Functions	460
	Definition of Group Functions	460
	Using Group Functions	461
	Group Data Using the GROUP BY Clause	465
	Creating Groups of Data	465
	The GROUP BY Clause	466
	Grouping by Multiple Columns	468
	Nested Group Functions	470
	Include or Exclude Grouped Rows Using the HAVING Clause	471
	Restricting Group Results	472
	The HAVING Clause	473
	Two-Minute Drill	475
	Describe the Group Functions	475
	Identify the Available Group Functions	475
	Group Data Using the GROUP BY Clause	475
	Include or Exclude Grouped Rows Using the HAVING Clause ...	476
	Self Test	476
	Self Test Answers	478
Chapter 12	SQL Joins	481
	Exam Objectives	481
	Write SELECT Statements to Access Data from More Than One Table	
	Using Equijoins and Nonequijoins	482
	Types of Joins	482

Joining Tables Using SQL:1999 Syntax	487
Qualifying Ambiguous Column Names	487
The NATURAL JOIN Clause	489
The Natural JOIN USING Clause	492
The Natural JOIN ON Clause	492
N-Way Joins and Additional Join Conditions	495
Nonequijoins	496
Join a Table to Itself Using a Self-Join	498
Joining a Table to Itself Using the JOIN . . . ON Clause	498
View Data That Does Not Meet a Join Condition by Using	
Outer Joins	500
Inner Versus Outer Joins	500
Left Outer Joins	501
Right Outer Joins	503
Full Outer Joins	503
Generate a Cartesian Product of Two or More Tables	505
Creating Cartesian Products Using Cross Joins	506
Two-Minute Drill	508
Write SELECT Statements to Access Data from More Than	
One Table Using Equijoins and Nonequijoins	508
Join a Table to Itself Using a Self-Join	509
View Data That Does Not Meet a Join Condition Using	
Outer Joins	509
Generate a Cartesian Product of Two or More Tables	509
Self Test	510
Self Test Answers	512
Chapter 13 Subqueries and Set Operators	515
Exam Objectives	515
Define Subqueries	516
Describe the Types of Problems That the Subqueries Can Solve	517
Use of a Subquery Result Set for Comparison Purposes	517
Generate a Table from Which to SELECT	518
Generate Values for Projection	518
Generate Rows to Be Passed to a DML Statement	519
List the Types of Subqueries	520
Single- and Multiple-Row Subqueries	520
Correlated Subqueries	521
Write Single-Row and Multiple-Row Subqueries	524
Describe the Set Operators	525
Sets and Venn Diagrams	525
Set Operator General Principles	526
Use a Set Operator to Combine Multiple Queries into	
a Single Query	529
The UNION ALL Operator	529
The UNION Operator	530

The INTERSECT Operator	530
The MINUS Operator	531
More Complex Examples	531
Control the Order of Rows Returned	533
Two-Minute Drill	533
Define Subqueries	533
Describe the Types of Problems That the Subqueries Can Solve ..	533
List the Types of Subqueries	534
Write Single-Row and Multiple-Row Subqueries	534
Describe the Set Operators	534
Use a Set Operator to Combine Multiple Queries into a Single Query	534
Control the Order of Rows Returned	534
Self Test	535
Self Test Answers	539

PART III**Advanced Database Administration****Chapter 14**

Configuring the Database for Backup and Recovery	543
Exam Objectives	543
Backup and Recovery Issues	544
Categories of Failures	546
Statement Failure	546
User Process Failure	547
Network Failure	548
User Errors	549
Media Failure	551
Instance Failure	552
Instance Recovery	552
The Mechanics of Instance Recovery	553
The Impossibility of Database Corruption	554
Tuning Instance Recovery	555
The MTTR Advisor and Checkpoint Auto-Tuning	555
Checkpointing	557
Preparing the Database for Recoverability	558
Protecting the Controlfile	558
Protecting the Online Redo Log Files	560
Archivelog Mode and the Archiver Process	563
Protecting the Archive Redo Log Files	566
The Flash Recovery Area	567
Recovery Files	567
Configure the Flash Recovery Area	568
Flash Recovery Area Space Usage	569
Two-Minute Drill	570
Identify the Types of Failure That Can Occur in an Oracle Database	570
Describe Ways to Tune Instance Recovery	571

	Identify the Importance of Checkpoints, Redo Log Files, and Archived Log Files	571
	Configure ARCHIVELOG Mode	571
	Configure Multiple Archive Log File Destinations to Increase Availability	571
	Overview of the Flash Recovery Area	572
	Configure the Flash Recovery Area	572
	Use the Flash Recovery Area	572
	Self Test	572
	Self Test Answers	575
Chapter 15	Back Up with RMAN	577
	Exam Objectives	577
	Backup Concepts and Terminology	578
	Using the RMAN BACKUP Command to Create Backups	580
	Server-Managed Consistent Backups	580
	Server-Managed Open Backups	582
	Incremental Backups	583
	Image Copies	588
	Protect Your Backups	588
	Parallelizing Backup Operations	590
	Encrypting Backups	591
	Configuring RMAN Defaults	592
	Managing and Monitoring RMAN Backups	594
	The LIST, REPORT, and DELETE Commands	594
	Archival Backups	596
	The Dynamic Performance Views	597
	Crosschecking Backups	597
	Two-Minute Drill	599
	Create Consistent Database Backups	599
	Back Up Your Database Without Shutting It Down	599
	Create Incremental Backups	599
	Automate Database Backups	600
	Manage Backups, View Backup Reports, and Monitor the Flash Recovery Area	600
	Define, Apply, and Use a Retention Policy	600
	Create Image File Backups	600
	Create a Whole Database Backup	600
	Enable Fast Incremental Backup	600
	Create Duplex Backups and Back Up Backup Sets	600
	Create an Archival Backup for Long-Term Retention	601
	Create a Multisection, Compressed, and Encrypted Backup ...	601
	Report On and Maintain Backups	601
	Configure Backup Settings	601
	Allocate Channels to Use in Backing Up	601
	Configure Backup Optimization	601
	Self Test	602
	Self Test Answers	604

Chapter 16	Restore and Recover with RMAN	607
	Exam Objectives	607
	The Data Recovery Advisor	608
	The Health Monitor and the ADR	608
	The Capabilities and Limitations of the DRA	609
	Using the Data Recovery Advisor	610
	Database Restore and Recovery	613
	Complete Recovery from Data File Loss Using RMAN	614
	Recovery of Datafiles in Noarchivelog Mode	614
	Recovery of a Noncritical File in Archivelog Mode	616
	Recovering from Loss of a Critical Datafile	619
	Incomplete Recovery	620
	Autobackup and Restore of the Controlfile	623
	Using Image Copies for Recovery	627
	Block Recovery	629
	Detection of Corrupt Blocks	629
	Block Media Recovery	630
	The BLOCK RECOVER Command	630
	Two-Minute Drill	631
	Describe the Data Recovery Advisor	631
	Use the Data Recovery Advisor to Perform Recovery (Controlfile, Redo Log File, and Datafile)	631
	Perform Complete Recovery from a Critical or Noncritical Data File Loss Using RMAN	631
	Perform Incomplete Recovery Using RMAN	632
	Recover Using Incrementally Updated Backups	632
	Switch to Image Copies for Fast Recovery	632
	Recover Using a Backup Control File	632
	Perform Block Media Recovery	633
	Self Test	633
	Self Test Answers	637
Chapter 17	Advanced RMAN Facilities	641
	Exam Objectives	641
	The Recovery Catalog	642
	The Need for a Recovery Catalog	642
	Creating and Connecting to the Catalog	643
	The Virtual Private Catalog	645
	Protecting and Rebuilding the Catalog	646
	Stored Scripts	649
	Using RMAN to Create Databases	651
	Tablespace Point-in-Time Recovery (TSPITR)	654
	The TSPITR Methodology	654
	Perform Automated TSPITR	655
	RMAN Performance and Monitoring	658
	Monitoring RMAN Sessions and Jobs	658

Tuning RMAN	662
Tuning the BACKUP Command	665
Configure RMAN for Asynchronous I/O	665
Two-Minute Drill	667
Identify Situations That Require an RMAN Recovery Catalog	667
Create and Configure a Recovery Catalog	667
Synchronize the Recovery Catalog	667
Create and Use RMAN Stored Scripts	668
Back Up the Recovery Catalog	668
Create and Use a Virtual Private Catalog	668
Create a Duplicate Database	668
Use a Duplicate Database	669
Restore a Database onto a New Host	669
Perform Disaster Recovery	669
Identify the Situations That Require TSPITR	669
Perform Automated TSPITR	670
Monitor RMAN Sessions and Jobs	670
Tune RMAN	670
Configure RMAN for Asynchronous I/O	671
Self Test	671
Self Test Answers	674
Chapter 18 User-Managed Backup, Restore, and Recovery	677
Exam Objectives	677
Backup and Recovery in One Page	678
User-Managed Database Backup	678
Backup in Noarchivelog Mode	678
Backup in Archivelog Mode	680
Backup of the Password and Parameter Files	682
Media Failure That Does Not Affect Datafiles	683
Recovery from Loss of a Multiplexed Controlfile	683
Recovery from Loss of a Multiplexed Online Redo Log File	685
Recovery from Loss of a Tempfile	688
Recovery from Loss of Datafiles	688
Recovery of Datafiles in Noarchivelog Mode	688
Recovery of a Noncritical Datafile in Archivelog Mode	689
Recovering a Critical Datafile in Archivelog Mode	690
User-Managed Incomplete Recovery	691
Two-Minute Drill	693
Recover from a Lost TEMP File	693
Recover from a Lost Redo Log Group	693
Recover from the Loss of a Password File	694
Perform User-Managed Complete Database Recovery	694
Perform User-Managed Incomplete Database Recovery	694
Perform User-Managed Backups	694
Identify the Need for Backup Mode	695
Back Up and Recover a Controlfile	695

	Self Test	695
	Self Test Answers	697
Chapter 19	Flashback	699
	Exam Objectives	699
	The Different Flashback Technologies	700
	Flashback Database	700
	Flashback Query, Transaction, and Table	701
	Flashback Drop	701
	Flashback Data Archive	702
	When to Use Flashback Technology	702
	Flashback Database	704
	Flashback Database Architecture	704
	Configuring Flashback Database	705
	Monitoring Flashback Database	707
	Using Flashback Database	709
	Limiting the Amount of Flashback Data Generated	713
	Flashback Drop	715
	The Implementation of Flashback Drop	715
	Using Flashback Drop	717
	Managing the Recycle Bin	720
	Flashback Query	723
	Basic Flashback Query	724
	Flashback Table Query	725
	Flashback Versions Query	728
	Flashback Transaction Query	729
	Flashback and Undo Data	735
	The Flashback Data Archive	736
	Two-Minute Drill	739
	Restore Dropped Tables from the Recycle Bin	739
	Perform Flashback Query	739
	Use Flashback Transaction	739
	Perform Flashback Table Operations	740
	Configure and Monitor Flashback Database and Perform Flashback Database Operations	740
	Set Up and Use a Flashback Data Archive	740
	Self Test	740
	Self Test Answers	744
Chapter 20	Automatic Storage Management	747
	Exam Objectives	747
	The Purpose of a Logical Volume Manager	748
	RAID Levels	748
	Volume Sizes	749
	Choice of RAID Level	750
	ASM Compared with Third-Party LVMs	750

The ASM Architecture	751
The Cluster Synchronization Service	751
The ASM Disks and Disk Groups	751
The ASM Instance	753
The RDBMS Instance	754
The ASM Files	755
Creating Raw Devices	756
Creating, Starting, and Stopping an ASM Instance	757
Creating ASM Disk Groups	760
Creating and Using ASM Files	762
ASM and RMAN	763
The ASMCMD Utility	765
Two-Minute Drill	766
Describe Automatic Storage Management (ASM)	766
Set Up Initialization Parameter Files for ASM and Database Instances	767
Start Up and Shut Down ASM Instances	767
Administer ASM Disk Groups	767
Self Test	768
Self Test Answers	771
Chapter 21 The Resource Manager	773
Exam Objectives	773
The Need for Resource Management	774
The Resource Manager Architecture	775
Consumer Groups	775
Resource Manager Plans	776
Resource Manager Configuration Tools	778
Managing Users and Consumer Groups	781
Resource Manager Plans	781
CPU Method	782
Use of the Ratio CPU Method	786
The Active Session Pool Method	787
Limiting the Degree of Parallelism	789
Controlling Jobs by Execution Time	790
Terminating Sessions by Idle Time	791
Restricting Generation of Undo Data	793
Automatic Consumer Group Switching	794
Adaptive Consumer Group Mapping	795
Two-Minute Drill	799
Understand the Database Resource Manager	799
Create and Use Database Resource Manager Components	800
Self Test	800
Self Test Answers	803

Chapter 22	The Scheduler	805
	Exam Objectives	805
	The Scheduler Architecture	806
	Scheduler Objects	807
	Jobs	807
	Programs	809
	Schedules	809
	Job Classes	810
	Windows	811
	Privileges	812
	Creating and Scheduling Jobs	813
	A Self-Contained Job	813
	Using Programs and Schedules	814
	Event-Driven Jobs	817
	Job Chains	819
	Lightweight Jobs	819
	Using Classes, Windows, and the Resource Manager	822
	Using Job Classes	823
	Using Windows	824
	Two-Minute Drill	826
	Create a Job, Program, and Schedule	826
	Use a Time-Based or Event-Based Schedule for Executing Scheduler Jobs	826
	Create Lightweight Jobs	826
	Use Job Chains to Perform a Series of Related Tasks	826
	Create Windows and Job Classes	827
	Use Advanced Scheduler Concepts to Prioritize Jobs	827
	Self Test	827
	Self Test Answers	829
Chapter 23	Moving and Reorganizing Data	831
	Exam Objectives	831
	SQL*Loader	832
	External Tables	834
	Directories	835
	Using External Tables	835
	Data Pump	838
	Data Pump Architecture	839
	Directories and File Locations	840
	Direct Path or External Table Path?	840
	Using Data Pump Export and Import	841
	Capabilities	841
	Using Data Pump with the Command-Line Utilities	842
	Using Data Pump with Database Control	843
	Tablespace Export and Import	845
	Resumable Space Allocation	850

Segment Reorganization	852
Row Chaining and Migration	853
Segment Shrink	855
Two-Minute Drill	859
Describe and Use Methods to Move Data (Directory Objects, SQL*Loader, External Tables)	859
Explain the General Architecture of Oracle Data Pump	860
Use Data Pump Export and Import to Move Data Between Oracle Databases	860
Describe the Concepts of Transportable Tablespaces and Databases	860
Manage Resumable Space Allocation	860
Reclaim Wasted Space from Tables and Indexes by Using the Segment Shrink Functionality	861
Self Test	861
Self Test Answers	863
Chapter 24 The AWR and the Alert System	865
Exam Objectives	865
The Automatic Workload Repository	866
Gathering AWR Statistics	866
Managing the AWR	867
Statistics, Metrics, and Baselines	869
The DBMS_WORKLOAD_REPOSITORY Package	869
The Database Advisory Framework	871
The Automatic Database Diagnostic Monitor	871
The Advisors	874
Automatic Maintenance Jobs	875
Using the Server-Generated Alert System	880
Alert Condition Monitoring and Notifications	880
Setting Thresholds	881
The Notification System	882
Two-Minute Drill	886
Use and Manage the Automatic Workload Repository	886
Use the Advisory Framework	886
Manage Alerts and Thresholds	887
Self Test	887
Self Test Answers	889
Chapter 25 Performance Tuning	891
Exam Objectives	891
Managing Memory	892
PGA Memory Management	892
SGA Memory Management	894
Automatic Memory Management	896
The Memory Advisors	897

	The SQL Tuning Advisor	900
	The Capabilities of the SQL Tuning Advisor	901
	Using the SQL Tuning Advisor with Enterprise Manager	901
	The SQL Tuning Advisor API: the DBMS_SQLTUNE Package	908
	The SQL Access Advisor	910
	Using the SQL Access Advisor with Database Control	910
	Using the SQL Access Advisor with DBMS_ADVISOR	913
	Identifying and Fixing Invalid and Unusable Objects	916
	Invalid Objects	916
	Unusable Indexes	918
	Database Replay	921
	Database Replay Workload Capture	921
	Database Replay Workload Preprocessing	922
	Launch the Replay	923
	Database Replay Analysis and Reporting	924
	Two-Minute Drill	927
	Use Automatic Memory Management	927
	Use Memory Advisors	928
	Troubleshoot Invalid and Unusable Objects	928
	Implement Automatic Memory Management	928
	Manually Configure SGA Parameters	928
	Configure Automatic PGA Memory Management	929
	Use the SQL Tuning Advisor	929
	Use the SQL Access Advisor to Tune a Workload	929
	Understand Database Replay	929
	Self Test	930
	Self Test Answers	933
Chapter 26	Globalization	937
	Exam Objectives	937
	Globalization Requirements and Capabilities	938
	Character Sets	938
	Language Support	940
	Territory Support	942
	Other NLS Settings	944
	Using Globalization Support Features	944
	Choosing a Character Set	945
	Changing Character Sets	946
	Globalization Within the Database	947
	Globalization at the Instance Level	948
	Client-Side Environment Settings	948
	Session-Level Globalization Settings	950
	Statement Globalization Settings	951
	Languages and Time Zones	952
	Linguistic Sorting and Selection	953
	The Locale Builder	954
	Using Time Zones	954

	Two-Minute Drill	957
	Customize Language-Dependent Behavior for the Database and Individual Sessions	957
	Work with Database and NLS Character Sets	958
	Self Test	958
	Self Test Answers	961
Chapter 27	The Intelligent Infrastructure	965
	Exam Objectives	965
	The Enterprise Manager Support Workbench	966
	The Automatic Diagnostic Repository (ADR)	966
	Problems and Incidents	967
	The ADR Command-Line Interface (ADRCI)	967
	The Support Workbench	968
	Patches	971
	Types of Patch	971
	Integration with MetaLink and the Patch Advisor	971
	Applying Patches	972
	Two-Minute Drill	978
	Use the Enterprise Manager Support Workbench	978
	Manage Patches	978
	Set Up the Automatic Diagnostic Repository	979
	Self Test	979
	Self Test Answers	980
Appendix	About the CD	983
	System Requirements	984
	Installing and Running MasterExam	984
	MasterExam	984
	Electronic Book	984
	Help	984
	Removing Installation(s)	985
	Technical Support	985
	LearnKey Technical Support	985
	Glossary	987
	Index	1003
