# Contents

ACKNOWLEDGMENTS .....	xix
INTRODUCTION .....	xxi
<b>1 Introduction to JavaScript .....</b>	<b>1</b>
What You Need to Know .....	2
Basic HTML and CSS Knowledge .....	3
Basic Text Editor and Web Browser Knowledge .....	3
Which Version? .....	6
Remember, It's Not Java .....	7
Similarities to Other Languages .....	8
Beginning with JavaScript .....	8
Object Based .....	8
Client Side .....	8
Scripting Language .....	9
Putting It All Together .....	9
Online Resources .....	10
Try This 1-1: Use JavaScript to Write Text .....	10

<b>2</b>	<b>Placing JavaScript in an HTML File</b>	<b>15</b>
	Using the HTML Script Tags	16
	Identifying the Scripting Language	16
	Calling External Scripts	17
	Using <noscript></noscript> Tags	17
	Creating Your First Script	19
	Writing a “Hello World” Script	19
	Creating an HTML Document for the Script	20
	Inserting the Script into the HTML Document	20
	Try This 2-1: Insert a Script into an HTML Document	22
	Using External JavaScript Files	23
	Creating a JavaScript File	23
	Creating the HTML Files	24
	Viewing the Pages in Your Browser	25
	Try This 2-2: Call an External Script from an HTML Document	26
	Using JavaScript Comments	27
	Inserting Comments on One Line	28
	Adding Multiple-Line Comments	28
<b>3</b>	<b>Using Variables</b>	<b>33</b>
	Understanding Variables	34
	Why Variables Are Useful	35
	Variables as Placeholders for Unknown Values	35
	Variables as Time-Savers	35
	Variables as Code Clarifiers	36
	Defining Variables for Your Scripts	36
	Declaring Variables	36
	Assigning Values to Variables	36
	Naming Variables	38
	Understanding Variable Types	40
	Number	40
	String	41
	Boolean	46
	Null	46
	Try This 3-1: Declare Variables	47
	Using Variables in Scripts	48
	Making a Call to a Variable	49
	Adding Variables to Text Strings	49
	Writing a Page of JavaScript	51
	Creating the Framework	51
	Defining the Variables	51
	Adding the Commands	52
	Modifying the Page	53
	Try This 3-2: Create an HTML Page with JavaScript	55

<b>4 Using Functions</b> .....	<b>59</b>
What a Function Is .....	60
Why Functions Are Useful .....	60
Structuring Functions .....	61
Declaring Functions .....	61
Defining the Code for Functions .....	62
Naming Functions .....	63
Adding Parameters to Functions .....	64
Adding Return Statements to Functions .....	66
Calling Functions in Your Scripts .....	67
Script Tags: Head Section or Body Section .....	68
Calling a Function from Another Function .....	70
Calling Functions with Parameters .....	72
Calling Functions with Return Statements .....	76
Other Ways to Define Functions .....	76
Try This 4-1: Create an HTML Page with Functions .....	79
Putting It All Together .....	81
Try This 4-2: Write Your Own Functions .....	83
<b>5 JavaScript Operators</b> .....	<b>87</b>
Understanding the Operator Types .....	88
Understanding Mathematical Operators .....	89
The Addition Operator (+) .....	90
The Subtraction Operator (−) .....	92
The Multiplication Operator (*) .....	92
The Division Operator (/) .....	93
The Modulus Operator (%) .....	94
The Increment Operator (++) .....	94
The Decrement Operator (−−) .....	95
The Unary Negation Operator (−) .....	96
Understanding Assignment Operators .....	97
The Assignment Operator (=) .....	97
The Add-and-Assign Operator (+=) .....	98
The Subtract-and-Assign Operator (−=) .....	99
The Multiply-and-Assign Operator (*=) .....	99
The Divide-and-Assign Operator (/=) .....	99
The Modulus-and-Assign Operator (%=) .....	99
Try This 5-1: Adjust a Variable Value .....	100
Understanding Comparison Operators .....	101
The Is-Equal-To Operator (==) .....	102
The Is-Not-Equal-To Operator (!=) .....	103
The Is-Greater-Than Operator (>) .....	103
The Is-Less-Than Operator (<) .....	104

The Is-Greater-Than-or-Equal-To Operator (>=)	104
The Is-Less-Than-or-Equal-To Operator (<=)	105
The Strict Is-Equal-To Operator (===)	105
The Strict Is-Not-Equal-To Operator (!==)	106
Understanding Logical Operators	107
The AND Operator (&&)	107
The OR Operator (  )	107
The NOT Operator (!)	108
The Bitwise Operators	108
Special Operators	109
Understanding Order of Operations	110
Try This 5-2: True or False?	111
<b>6 Conditional Statements and Loops</b>	<b>115</b>
Defining Conditional Statements	116
What Is a Conditional Statement?	116
Why Conditional Statements Are Useful	117
Using Conditional Statements	117
Using if/else Statement Blocks	117
Using the switch Statement	125
Using the Conditional Operator	126
Try This 6-1: Construct an if/else Block	129
Defining Loops	130
What Is a Loop?	130
Why Loops Are Useful	130
Using Loops	131
for	131
while	137
do while	139
for in	140
for each in	140
Using break and continue	141
Try This 6-2: Work with for Loops and while Loops	143
<b>7 Event Handlers</b>	<b>147</b>
What Is an Event Handler?	148
Why Event Handlers Are Useful	148
Understanding Event Handler Locations and Uses	149
Using an Event Handler in an HTML Element	149
Using an Event Handler in the Script Code	151
Try This 7-1: Create a Button	153
Learning the Event Handlers	154
The Abort Event (onabort)	155
The Blur Event (onblur)	155

The Change Event (onchange) .....	156
The Click Event (onclick) .....	157
The Focus Event (onfocus) .....	158
The Keydown Event (onkeydown) .....	159
The Keypress Event (onkeypress) .....	160
The Keyup Event (onkeyup) .....	160
The Load Event (onload) .....	160
The Mousedown Event (onmousedown) .....	161
The Mousemove Event (onmousemove) .....	161
The Mouseover Event (onmouseover) .....	162
The Mouseout Event (onmouseout) .....	163
The Mouseup Event (onmouseup) .....	164
The Reset Event (onreset) .....	164
The Submit Event (onsubmit) .....	164
The Unload Event (onunload) .....	164
Try This 7-2: Use Events to Send Out Alerts .....	165
Creating Scripts Using Event Handlers .....	167
The Text Box Message .....	167
The Button Link .....	169
Other Ways to Register Events .....	171
The addEventListener() Method .....	172
The attachEvent() Method .....	172
<b>8 Objects .....</b>	<b>175</b>
Defining Objects .....	176
What Is an Object? .....	176
Why Objects Are Useful .....	177
Creating Objects .....	177
Naming .....	177
Object Structure .....	178
Adding Methods .....	186
Object Manipulation Statements .....	190
Try This 8-1: Create a Computer Object .....	193
Understanding Predefined JavaScript Objects .....	194
The Navigator Object .....	194
The History Object .....	199
Try This 8-2: Practice with the Predefined Navigator Object .....	201
<b>9 The Document Object .....</b>	<b>205</b>
Defining the Document Object .....	206
Using the Document Object Model .....	206
Using the Properties of the Document Object .....	207
The Color Properties .....	210
The anchors Property (Array) .....	210

The cookie Property .....	210
The dir Property .....	211
The domain Property .....	212
The formname Property .....	213
The forms Property (Array) .....	215
The images Property (Array) .....	215
The lastModified Property .....	217
The layers Property (Array) .....	217
The all Property .....	218
The links Property (Array) .....	219
The referrer Property .....	219
The title Property .....	219
The URL Property .....	220
The URLUnencoded Property .....	220
Using the Methods of the Document Object .....	222
The getElementById() Method .....	224
The getElementsByClassName() Method .....	224
The getElementsByTagName() Method .....	225
The open() and close() Methods .....	225
The write() Method .....	227
The writeln() Method .....	227
Creation Methods .....	228
Try This 9-1: Add a DOM Node to the Document .....	233
Creating Dynamic Scripts .....	234
Styles in JavaScript .....	234
Coding a Dynamic Script .....	235
The innerHTML Property .....	236
Try This 9-2: Trying out Property Changes .....	238
<b>10 Window Object .....</b>	<b>241</b>
An Introduction to the Window Object .....	242
Using the Properties of the Window Object .....	242
The closed Property .....	243
The defaultStatus Property .....	244
The frames Property (Array) .....	244
The innerHeight and innerWidth Properties .....	244
The length Property .....	246
The location Property .....	246
The name Property .....	246
The opener Property .....	247
The parent Property .....	248
The self Property .....	248
The status Property .....	248
The top Property .....	248

Try This 10-1: Use the location and innerWidth Properties .....	248
Using the Methods of the Window Object .....	249
The alert() Method .....	249
The confirm() Method .....	251
The find() Method .....	253
The home() Method .....	253
The print() Method .....	254
The prompt() Method .....	255
The open() Method .....	256
The close() Method .....	261
The moveBy() Method .....	262
The moveTo() Method .....	263
The resizeBy() Method .....	265
The resizeTo() Method .....	265
The scrollBy() Method .....	265
The scrollTo() Method .....	265
The setInterval() Method .....	265
The clearInterval() Method .....	266
The setTimeout() Method .....	267
The clearTimeout() Method .....	267
Try This 10-2: Use the setTimeout() and confirm() Methods .....	269
<b>11 JavaScript Arrays .....</b>	<b>273</b>
What Is an Array? .....	274
Why Arrays Are Useful .....	275
Defining and Accessing Arrays .....	275
Naming an Array .....	275
Defining an Array .....	276
Accessing an Array's Elements .....	276
Other Ways to Define Arrays .....	277
Understanding the Properties and Methods of the Array Object .....	279
Properties .....	279
Methods .....	282
Extended Array Methods .....	291
Using Arrays with Loops .....	292
Creating Array Elements .....	292
Moving Through Arrays .....	293
Try This 11-1: Use Loops with Arrays .....	297
Using Associative Arrays .....	298
Defining Associative Arrays .....	299
Accessing Associative Arrays .....	299
Try This 11-2: Use Associative Arrays .....	301

<b>12 Math, Number, and Date Objects</b>	<b>305</b>
Using the Math Object	306
What Is the Math Object?	306
How the Math Object Is Useful	306
Properties	306
Methods	308
Try This 12-1: Display a Random Link on a Page	321
Understanding the Number Object	322
Properties	322
Methods	324
Using the Date Object	326
Properties	326
Methods	327
Methods That Get Values	329
Methods That Set Values	332
Other Methods	333
How About Some Date Scripts?	334
Try This 12-2: Create a JavaScript Clock	338
<b>13 Handling Strings</b>	<b>341</b>
Introduction to the String Object	342
The String Object	342
The String Literal	343
What's the Difference?	343
Using the Properties of the String Object	344
The constructor Property	344
The length Property	344
The prototype Property	345
Using the Methods of the String Object	345
Methods That Add HTML Tags	345
The Other Methods	351
Try This 13-1: Use charAt() to Find a First Letter	359
Putting Methods Together	360
Try This 13-2: Use indexOf() to Test an Address	362
Using Regular Expressions	363
Creating Regular Expressions	363
Testing Strings Against Regular Expressions	364
Adding Flags	365
Creating Powerful Patterns	366
Grouping Expressions	369
The replace(), match(), and search() Methods	370
More Information	372

<b>14 JavaScript and Forms</b>	<b>375</b>
Accessing Forms	376
Using the forms Array	376
Using Form Names	380
Using an ID	381
Using the Properties and Methods of the Form Object	382
Properties	382
Methods	392
Ensuring the Accessibility of Forms	392
Using Proper Element and Label Order	393
Using <label></label> Tags	393
Using <fieldset></fieldset> Tags	393
Not Assuming Client-Side Scripting	394
Validation	395
onsubmit and the return Statement	395
Techniques	396
Try This 14-1: Request a Number	398
Using Forms for Navigation	399
Clicking a Button	399
Try This 14-2: Build a Select Box Navigation Script	403
<b>15 JavaScript and Frames</b>	<b>407</b>
An Introduction to Frames	408
Purpose of Frames	408
The Code Behind the Frames	409
Frame Options	411
Accessing Frames	414
The frames Array	414
Using a Frame Name	417
Changing Frames	418
Change a Single Frame	418
Change Multiple Frames	419
Try This 15-1: Change Frames	422
Step by Step	422
Frame Navigation	423
Using the Select Box with Frames	423
Breaking Out of Frames	424
Sending Viewers to Frames	426
Using Variables Across Frames	428
Try This 15-2: Use Variables	432

<b>16 An Introduction to Advanced Techniques</b>	<b>435</b>
Debugging Scripts	436
Types of Errors	436
JavaScript and Accessibility	442
Separate Content from Presentation	442
Enhancing Content	444
Try This 16-1: Make This Code Accessible	445
Using Cookies	446
Setting a Cookie	446
Reading a Cookie	449
Try This 16-2: Remember a Name	451
Working with Images	452
Preloading	452
Rollovers	454
JavaScript Security	460
Security and Signed Scripts	460
Page Protection	460
AJAX	462
JavaScript Libraries	463
<b>A Answers to Self Tests</b>	<b>467</b>
Chapter 1: Introduction to JavaScript	468
Chapter 2: Placing JavaScript in an HTML File	468
Chapter 3: Using Variables	469
Chapter 4: Using Functions	469
Chapter 5: JavaScript Operators	470
Chapter 6: Conditional Statements and Loops	471
Chapter 7: Event Handlers	471
Chapter 8: Objects	472
Chapter 9: The Document Object	473
Chapter 10: Window Object	473
Chapter 11: JavaScript Arrays	474
Chapter 12: Math, Number, and Date Objects	475
Chapter 13: Handling Strings	475
Chapter 14: JavaScript and Forms	476
Chapter 15: JavaScript and Frames	477
