| ACKNOWLEDGMENTS | xxv |
| INTRODUCTION | xxix |

PART I

Getting Started

| | |
|---|-----------|
| I An Overview of the E-Business Suite | 3 |
| The Structure and Scope of the E-Business Suite | 4 |
| Accounting Methods | 8 |
| Operational Control | 8 |
| The Package Families | 9 |
| The Benefits of Implementing Oracle E-Business Suite | 11 |
| What Are Your Objectives? Setting Parameters and Expectations | 12 |
| Reengineer—Now or Later? | 12 |
| Conclusion | 13 |
| 2 Implementing the E-Business Suite—Essential Concepts | 15 |
| Capturing the Financial Information Relevant to Your Business | 16 |
| Flexfields | 16 |
| Workflow | 25 |
| Accounting for Transactions | 26 |
| Meeting the Varied Needs of Complex Organizations | 29 |
| The Organizational Model Within Oracle E-Business Suite | 29 |
| Financials in the Global Businesses Environment | 33 |
| Creating a Model of Your Business | 34 |
| Global Financial Applications | 36 |
| Conclusion | 38 |

PART II

The Financial Applications

| | | |
|----------|---|------------|
| 3 | Oracle General Ledger | 41 |
| | The Heart of Your Accounting System | 42 |
| | Overview of General Ledger | 43 |
| | Integration with Other Financials Modules | 51 |
| | General Ledger Setup | 64 |
| | Accounting Flexfield Design—Best Practice | 69 |
| | What to Consider | 70 |
| | Good Design Principles | 80 |
| | What to Avoid | 84 |
| | General Ledger Reporting | 85 |
| | Financial Statement Generator | 85 |
| | Oracle Financial Analyzer | 93 |
| | The Applications Desktop Integrator (ADI) | 94 |
| | Oracle General Ledger Data Model | 94 |
| | Conversion from Legacy Systems | 97 |
| | Conclusion | 101 |
| 4 | Budgeting and Allocations | 103 |
| | Differences Between Financial and Management Accounting | 104 |
| | The Limitations of Financial Accounting | 105 |
| | Different Types of Reports | 105 |
| | Bridging the Gap | 106 |
| | Budgeting | 106 |
| | The Budgeting Process | 106 |
| | Budgetary Control for Nonprofit Organizations | 107 |
| | Types of Budgets | 108 |
| | Allocations | 110 |
| | Allocation Formulas | 111 |
| | AutoAllocations Workbench | 112 |
| | Conclusion | 113 |
| 5 | Oracle Payables | 115 |
| | Purposes of a Payables System | 116 |
| | Innovative Uses of Oracle Payables | 117 |
| | An Overview of Payables in Your Business | 120 |
| | Timing Your Liability | 121 |
| | The Payables Workflow | 121 |
| | The Payables Cycle | 123 |
| | Supplier Data | 133 |

| | |
|---|------------|
| Accounting Methods | 135 |
| Accounting Entries for Payables Transactions | 136 |
| Integration with Other Financials Modules | 141 |
| The Oracle Payables Data Model | 143 |
| Conclusion | 148 |
| 6 Oracle Receivables | 149 |
| Oracle Receivables and Your AR Business Processes | 150 |
| iReceivables | 152 |
| Creating and Managing the Customer Database | 152 |
| Customer Profiles | 154 |
| The Customer Account | 154 |
| Business Purposes | 156 |
| Transactions | 156 |
| Invoices | 157 |
| Tax Considerations | 158 |
| Automatic Account Generation | 160 |
| Printing Transactions | 162 |
| Debit Memos | 164 |
| Credit Memos | 164 |
| Receipts | 165 |
| Adjustments | 173 |
| Commitments | 174 |
| Refunds to Customers | 176 |
| Transfer to Doubtful Debt | 177 |
| Customer Follow-Up | 178 |
| Customer Calls | 178 |
| Dunning Letters | 179 |
| Statements | 182 |
| Integration with Other Modules | 184 |
| Order Management | 184 |
| Projects | 186 |
| Inventory | 186 |
| General Ledger | 186 |
| Receivables Open Interfaces | 187 |
| The Receivables Data Model | 188 |
| Advanced Features | 193 |
| The Customer Account and Balance Due | 194 |
| Reconciliation | 196 |
| The Purge Feature | 197 |
| Receivables Conversion Issues | 198 |
| Conclusion | 201 |

| | |
|--|------------|
| 7 Oracle Cash Management | 203 |
| The Need for Cash Management | 205 |
| Bank Reconciliation | 206 |
| Bank Statement Interface Case Study | 208 |
| Cash Forecasting | 215 |
| Cash Management Interfaces | 218 |
| The Reconciliation Open Interface | 218 |
| The Forecasting Open Interface | 218 |
| The Cash Management Data Model | 219 |
| Conclusion | 220 |
| 8 Oracle Assets | 221 |
| Registering and Tracking Assets | 222 |
| The Asset Additions Cycle | 223 |
| Tagging with Asset Identifiers | 224 |
| The Asset Key Flexfield | 225 |
| The Location Flexfield | 226 |
| The Category Flexfield | 227 |
| Depreciation | 228 |
| Ledger Accounting | 229 |
| Business Taxes and the Need for Multiple Asset Books | 230 |
| Depreciation Methods | 232 |
| Leased Assets | 238 |
| Capital Budgeting | 238 |
| Converting to Oracle Assets | 238 |
| Converting Tax Books | 241 |
| Trade-offs Between Recordkeeping and Reporting | 242 |
| Conclusion | 243 |
| 9 Oracle Purchasing | 245 |
| Purchasing Overview | 246 |
| Requisitions | 247 |
| Suppliers | 249 |
| Supplier Relationships | 249 |
| Communicating with Suppliers | 258 |
| The Implications of Multi-Org | 260 |
| Multiple Organizations in Inventory | 260 |
| Receiving | 261 |
| Exceptions | 261 |
| Receipt Routing | 262 |
| Drop Shipment Receipts | 263 |
| Productivity versus Security | 263 |
| Payment on Receipt | 264 |

| | |
|--|------------|
| Integration with Other Modules | 265 |
| Payables Integration | 265 |
| Projects Integration | 266 |
| Order Management Integration | 267 |
| Inventory Integration | 267 |
| Accounting Issues | 268 |
| Average and Standard Costing | 268 |
| Accrual Accounts | 269 |
| Automatic Account Generation | 269 |
| Implementation | 270 |
| Converting the Vendor Master | 270 |
| Converting Transactions | 271 |
| Converting Purchasing History | 272 |
| Testing | 273 |
| Customization | 274 |
| Conclusion | 275 |
| 10 Oracle Inventory | 277 |
| Overview of Inventory | 278 |
| Integration with Other Modules | 280 |
| Item Setup | 280 |
| Item Numbers | 281 |
| Attributes | 283 |
| Revisions | 291 |
| Bills of Material | 291 |
| Grouping Items | 293 |
| Categories and Category Sets | 293 |
| Catalogs | 296 |
| Issues of Volume | 297 |
| Physical Storage and Management | 298 |
| Inventory Organizations | 298 |
| Subinventories | 299 |
| Locators | 300 |
| Lot Processing | 301 |
| Serial Number Processing | 302 |
| Balances | 303 |
| Counting | 304 |
| Forecasting and Demand | 310 |
| Industry Efforts to Improve Stock Movement | 313 |
| Kanban | 314 |
| Warehouse Movements | 315 |

| | |
|---|------------|
| Conversion Issues | 316 |
| Item Master Conversion | 316 |
| Transaction Conversion | 318 |
| Location Conversion | 318 |
| Accounting Entries for Inventory Transactions | 321 |
| Additional Accounting Transactions | 322 |
| Variances | 324 |
| Average versus Standard Costing | 325 |
| Nonmaterial Expense Collection | 326 |
| Setting Standard Costs | 327 |
| The Costing Tables | 331 |
| Determining Sales Prices | 333 |
| Project Manufacturing | 334 |
| INTRASTAT Reporting | 334 |
| Activity-Based Costing | 334 |
| Planning and Debugging Cost Transactions | 335 |
| Operation of Oracle Inventory | 337 |
| Responsibilities | 337 |
| Interface Manager Processing | 338 |
| Archiving and Deleting Data | 339 |
| Advantages of an Open Design | 340 |
| Conclusion | 340 |
| II Oracle Order Management | 343 |
| OM Setups | 347 |
| Defaulting Rules | 347 |
| Functional Differences | 348 |
| Attributes and Entities in Order Management | 348 |
| Dependencies Among Attributes | 349 |
| Sources of Values | 349 |
| Processing Constraints | 350 |
| Functional Differences | 351 |
| Migration/Upgrade from Security Rules | 351 |
| Workflow Integration | 352 |
| Migration/Upgrade from Order Types | 353 |
| The 11i Customer Model | 353 |
| A Single Source of Truth | 353 |
| The Party Concept | 354 |
| Customer Agreements | 357 |
| Sales Credits | 358 |
| Using Credit Cards in Oracle Order Management | 358 |

| | |
|---|------------|
| Oracle Configurator Developer | 361 |
| Items in Order Management | 364 |
| Enhanced Scheduling | 367 |
| Available-to-Promise | 368 |
| Shipment Scheduling | 368 |
| Specific Order Types | 370 |
| Internal Sales Orders | 371 |
| Drop Shipment | 372 |
| Return Material Authorizations (RMAs) | 373 |
| Oracle Release Management | 374 |
| Oracle Shipping | 375 |
| Pricing | 384 |
| Price List Elements | 386 |
| Maintaining Price Lists | 387 |
| GSA Pricing | 388 |
| Multicurrency Pricing | 388 |
| OM Key Features | 388 |
| Cross References | 389 |
| Customer Items | 389 |
| Decimal Quantity Ordering | 389 |
| Folder-enabled Forms | 389 |
| Automatic Attachments | 390 |
| Notifications | 390 |
| Process Messages | 390 |
| Mass Change/Other Functionality | 391 |
| Integration with Order Capture | 391 |
| Order Purge | 392 |
| Accounting | 392 |
| Integration with Other Modules | 393 |
| Integration with Receivables | 393 |
| Integration with Inventory | 394 |
| Integration with Purchasing | 394 |
| Conversion Issues | 394 |
| Order Import | 395 |
| Responsibilities | 396 |
| Conclusion | 396 |
| 12 Foreign Currency Operations | 399 |
| Multicurrency Accounting | 400 |
| Foreign Currency Transactions | 401 |
| Revaluation | 402 |

| | |
|---|------------|
| Conversion | 403 |
| Balance Translation | 403 |
| The Euro | 404 |
| Reporting in Multiple Currencies | 405 |
| Multiple Reporting Currencies (MRC) | 406 |
| 1-2-3 EFC | 407 |
| MRC and GL Translation—The Difference | 407 |
| Migration to the Euro | 408 |
| Account Inquiry in Either Primary or Reporting Currency | 410 |
| One Step Subledger Processing | 410 |
| Conclusion | 410 |
| 13 Oracle Self-Service Web Applications | 411 |
| Oracle’s Vision and Direction | 412 |
| Oracle Self-Service Web Applications Architecture | 413 |
| Internet Procurement | 414 |
| Oracle Self-Service Time and Self-Service Expenses | 418 |
| Oracle iReceivables | 421 |
| Implementation Considerations | 421 |
| Other Self-Service Web Applications | 423 |
| Conclusion | 424 |
| 14 Oracle Projects | 425 |
| Setup | 427 |
| Costing | 435 |
| Billing | 439 |
| Intercompany Projects | 441 |
| Interproject Billing | 442 |
| AutoAccounting | 442 |
| Project Processing Cycle | 445 |
| Reporting | 446 |
| Integration with Other Modules | 448 |
| Client Extensions | 455 |
| Data Conversion | 456 |
| Conclusion | 457 |
| 15 Oracle Workflow and the Implementation Wizard | 459 |
| Workflow Architecture | 460 |
| Workflow User Client Tier | 461 |
| Application Server Tier | 461 |
| Oracle Server Tier | 462 |
| Embedded or Standalone | 463 |
| Using Workflow | 465 |
| Prebuilt Workflows | 472 |

| | |
|---|------------|
| Wizard Overview | 472 |
| Why You Need a Wizard | 473 |
| Using the Implementation Wizard | 474 |
| Conclusion | 475 |
| 16 New Applications in Release 11i | 477 |
| Oracle Property Manager | 478 |
| An Overview of Property Management | 478 |
| Integration with Other Applications | 485 |
| Oracle Treasury | 488 |
| An Overview of Treasury Operations | 488 |
| Integration with Other Applications | 490 |
| Market Data Feed | 492 |
| Business Intelligence System | 492 |
| Architecture | 493 |
| Conclusion | 497 |

PART III

Managing and Customizing an Applications Environment

| | |
|---|------------|
| 17 The Oracle Financials Environment | 501 |
| Online Operations | 503 |
| Query Mode | 504 |
| Data-entry Mode | 505 |
| Messages | 505 |
| Navigation and Special Functions in Forms | 506 |
| Display Formats | 507 |
| Multiple Open Windows | 509 |
| Batch Operations | 509 |
| The Concurrent Manager | 510 |
| Concurrent Program Parameters | 513 |
| Request Sets | 514 |
| Printing and Other Means of Output | 515 |
| Flexfields | 516 |
| Key Flexfields | 517 |
| Descriptive Flexfields | 518 |
| Contexts | 520 |
| Flexfield Validation | 520 |
| Flexfield Security | 522 |
| Flexfield Definition | 523 |
| National Language Support (NLS) | 525 |
| AOL-level Language Determination | 525 |
| National Language Support for Reports | 526 |

| | |
|---|------------|
| National Language Support for Flexfields | 527 |
| National Language in Data | 527 |
| Alerts | 527 |
| Application Management | 529 |
| Users and Responsibilities | 529 |
| Security | 530 |
| Instances | 533 |
| File Storage | 535 |
| Quickcodes and Lookup Types | 537 |
| Managing the Applications Environment | 538 |
| Multiple Environments for Development | 538 |
| Multiple Use of the Applications in Production | 541 |
| Multi-Org | 541 |
| Profile Options | 542 |
| Oracle's Application Implementation Methodology (AIM) | 543 |
| Hardware Considerations | 544 |
| Conclusion | 545 |
| 18 Oracle Applications Technical Architecture | 547 |
| Release 11i—The E-Business Suite | 549 |
| Architecture Components | 549 |
| The Client Tier | 549 |
| The Applications Tier | 550 |
| The Database Tier | 552 |
| Communications for Each Type of Session | 554 |
| Mapping the Architecture to Hardware | 555 |
| Database Server Sizing: Your Processor, Memory, and Disk Space | 556 |
| Windows and UNIX Operating Systems | 559 |
| Base Software and Communication Technologies | 563 |
| The Transition to Global Installations | 564 |
| Time Zones | 565 |
| Support Advances and Tools | 565 |
| Platinum Versions | 565 |
| Oracle Enterprise Manager | 566 |
| Backups and Cloning Environments | 566 |
| Conclusion | 568 |
| 19 Security | 569 |
| Architecture of the Financials | 570 |
| The Universe of Threats | 575 |
| Unauthorized Activity by Authorized Users of the Apps | 575 |
| Unauthorized Users of the Oracle Applications | 576 |

| | |
|--|------------|
| Physical Security Threats | 576 |
| Damage Caused by Fraudulent Users | 577 |
| Threats Outside of the Oracle Applications | 578 |
| RDBMS Level Compromise | 579 |
| Desktop Level Security Considerations | 580 |
| Development and Production Environments | 580 |
| Network Level Compromises | 581 |
| Countermeasures | 582 |
| Security Policy Definition | 582 |
| Access Control Policies | 584 |
| Control of Internet Access | 585 |
| An Overview of Public Key Cryptography | 585 |
| Implementation of Public Key Cryptography | 590 |
| Virtual Private Networks (VPNs) | 593 |
| Strong Authentication | 593 |
| Virus Threats | 594 |
| Hacker Countermeasures | 595 |
| Conclusion | 596 |
| 20 Customization and Modification | 599 |
| Anticipating and Planning Customizations and Modifications | 601 |
| Risks and Costs in Customization | 602 |
| The Framework for Modifications | 606 |
| Custom Output | 618 |
| Overview of the Open Interfaces | 626 |
| Populating the Open Interfaces | 628 |
| Scripts for Inserting Rows into Standard Tables | 632 |
| Updating Standard Tables | 636 |
| Using Descriptive Flexfields | 638 |
| Customizing Workflows | 642 |
| Custom Forms | 642 |
| Messages | 644 |
| Performance Tuning | 646 |
| The Analysis Process | 647 |
| User Reference Manuals | 648 |
| Technical Reference Manuals (TRMs) | 648 |
| Reading Code | 649 |
| Laboratory Method | 650 |
| Detailed Table Analysis | 651 |
| Regression Testing | 653 |
| Using a Regression Tester for Mass Updates | 654 |

| | |
|---|------------|
| Document Control | 655 |
| Log Maintenance | 656 |
| Configuration Management | 662 |
| Conclusion | 665 |
| 21 Project Organization and Management | 667 |
| Oracle Software as a Step Toward Corporate Maturity | 668 |
| Spreadsheets versus Project Management Software | 670 |
| Developing the Project Plan | 672 |
| The Project Budget | 674 |
| The Project Management Hierarchy | 676 |
| Team Formation | 677 |
| Functional Team Leads | 679 |
| Database Administrator | 679 |
| Programmers | 680 |
| Sources of Staffing | 681 |
| Staff Size | 683 |
| Types of Contracts | 684 |
| Project Phasing | 687 |
| Managing Your Relationship with Oracle | 688 |
| Oracle Releases and Versions | 688 |
| Resolving Errors: iTARs and Patches | 689 |
| Managing Bug Fixes | 691 |
| Reference Sources for Oracle Applications | 692 |
| Applications User References | 692 |
| AOL References | 693 |
| Online Help Within the Applications | 694 |
| Applications Technical References | 694 |
| Oracle Tools and RDBMS References | 695 |
| Third-party Oracle References | 696 |
| Operating System References | 697 |
| User's Group Materials | 697 |
| Managing Implementation Activities | 697 |
| The Solution Definition | 698 |
| Written Business Procedures | 701 |
| Testing | 701 |
| Configuration Management | 706 |
| Problem Management | 707 |
| Quality Assurance | 707 |
| Conclusion | 708 |

| | | |
|-----------|--|------------|
| 22 | Data Conversion, Training, and Cutover | 709 |
| | Training Requirements | 710 |
| | Introductory Training | 710 |
| | Technical Training | 712 |
| | Cutover Training | 713 |
| | The Data Conversion Approach | 713 |
| | Data Mapping: Legacy to Oracle | 714 |
| | Conversion Processing and Cleanup | 717 |
| | Conversion Strategies | 721 |
| | The Cutover Plan | 723 |
| | Phased Cutover | 727 |
| | Post-cutover Activity | 728 |
| | Sunsetting the Legacy System | 729 |
| | Conclusion | 730 |
| 23 | Tips and Tricks | 731 |
| | Closing Periods—Month End and Year End | 732 |
| | Finding Rogue Transactions | 734 |
| | Year End | 735 |
| | The Import References Table | 736 |
| | The Global Accounting Engine | 737 |
| | Freeze GL Journals | 738 |
| | Subledger Drilldown in 11i | 738 |
| | Lesser-known Features | 738 |
| | Cross-ledger Transactions | 740 |
| | Segment-level Security | 741 |
| | Matching and Carry Forward in GL | 741 |
| | Rollback the Effect of Asset Depreciation | 742 |
| | Changing the Date Format | 743 |
| | Automatic Job Submission | 743 |
| | Hard-to-Guess Password Validation | 744 |
| | Forms Runtime Diagnostics (FRD) | 745 |
| | FNDXLOAD | 745 |
| | Context Variable Used by Multi-org Views | 747 |
| | Using eTRM | 748 |
| | Troubleshooting Common Problems | 749 |
| | Identifying Customizations Prior to an Upgrade | 750 |
| | Invalid Bank Accounts and EFT Programs | 751 |
| | Mass Update of Customer Information in Receivables | 752 |
| | Mismatched Account Types | 753 |
| | Correcting Data Problems | 754 |

| | |
|--|-----|
| Researching Hanging Processes | 755 |
| Boosting the Hit Rate of Receivables Lockbox | 755 |
| Case Study | 755 |
| Rebuilding Interface Tables | 758 |
| Running the GL Optimizer | 759 |
| Concurrent Manager Queue Design | 759 |
| Conclusion | 760 |

PART IV

Other Oracle Applications

| | |
|--|------------|
| 24 Oracle Financial Analyzer | 763 |
| Introduction | 764 |
| Oracle Express | 765 |
| Express Architecture and Components | 765 |
| Oracle Express Server | 768 |
| Express Data Model | 769 |
| Express Database Design | 771 |
| How Express Stores Data | 772 |
| Sparse Data | 773 |
| Other Express Storage and Performance Considerations | 776 |
| Oracle Financial Analyzer | 778 |
| OFA Architecture | 778 |
| Implementing OFA | 780 |
| OFA Application Design | 781 |
| OFA General Ledger Link | 782 |
| Loading Non-Oracle General Ledger Information | 789 |
| Other OFA Implementation Tasks | 791 |
| Future Product Direction | 794 |
| Conclusion | 794 |
| 25 Overview of CRM, HR, and Manufacturing | 795 |
| Customer Relationship Management (CRM) | 797 |
| Marketing | 797 |
| Sales | 799 |
| Service | 802 |
| The Human Resources Suite | 805 |
| Oracle Human Resources | 806 |
| Oracle Payroll | 807 |
| Oracle Training Administration | 808 |
| Oracle Time Management | 808 |

| | |
|---|------------|
| The Manufacturing Suite | 809 |
| Oracle Bill of Materials | 809 |
| Oracle Engineering | 811 |
| Oracle Master Production Schedule | 811 |
| Oracle Material Requirements Planning | 812 |
| Oracle Work in Process | 812 |
| Oracle Flow Manufacturing | 813 |
| Oracle Process Manufacturing (OPM) | 813 |
| Oracle Quality | 816 |
| Conclusion | 819 |
| Index | 821 |
